

Roto Sash Lift

Over time, it's common for casement windows to experience sash sag due to gravity. Unlike traditional sash lift blocks, Roto designed a unique sash lift with built-in rollers to prevent sash sag over time. As the window is cranked to the closed position, the sash will easily glide against the rollers and return to its home position.

Features & Benefits

- Helps prevent sash sag from taking place
- Staggered rollers incrementally lift the sash to original cavity spacing with little to no friction
- Cost effective solution to help extend the window's lifespan
- Two variants offered with different heights, depending on application
- Currently offered in white and black finishes

Part Number	Description	Box Quantity
628362	SASH LIFT WHITE	500
628363	SASH LIFT BLACK	500
833024	1/2" SASH LIFT WHITE	500
833025	1/2" SASH LIFT BLACK	500
